

CSE444 Term Project Report

Due Date: June 19, 2026 11:59 PM

Purpose: The purpose of this assignment is to document the development of your software project in a professional and systematic manner. The report should demonstrate how software engineering principles were applied throughout the project and how Artificial Intelligence (AI) tools were utilized to support the development process.

You are expected to present your project following the Software Development Life Cycle (SDLC), providing evidence of decisions, artifacts, and outcomes produced during each phase.

Report Structure: The project report will contain the following sections. Sections details are given in the report template.

- 1. Introduction**
- 2. Requirements Analysis**
- 3. System Design**
- 4. Implementation**
- 5. Testing and Validation**
- 6. Deployment and Usage**
- 7. Maintenance and Future Improvements**
- 8. Reflection on AI Usage**
- 9. Conclusion**

Deliverables: You will be delivering the following content in a ZIP file.

1. A project report in PDF format.
2. Supporting artifacts (diagrams, screenshots, test documents, datasets, etc.).
3. Source code repository.

Submission Guidelines

- Report length: 10–20 pages (excluding appendices).
- Use clear section headings and professional formatting.
- Include figures, diagrams, and tables where appropriate.
- All external resources, libraries, AI tools, and references must be properly cited.
- The report should be written in a professional software engineering style.
